Express Warranty

All goods sold hereunder are warranted to be free from defects in material and workmanship and/or conform to applicable specifications, drawings, or blueprints. THESE EXPRESS WARRANTIES ARE IN LIEU OF AND EXCLUDE ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESSED OR IMPLIED BY ANY LITERATURE, DATA, OR PERSON. Sellers sole obligation under these warranties shall be to credit or replace any item or part manufactured by Seller and which is proved to be other than as warranted.

Seller shall have the sole right to determine whether such parts shall be repaired or replaced or whether credit shall be issued. No allowance shall be made for any labor charges of Buyer for inspection, installation, or tear down for replacement of parts, adjustments, or repairs. In no event shall Seller be made liable for collateral, consequential, or contingent damages. Our products are not warranted for any time period, any measure of service, or any specific purpose. The use of Santech's products in refrigerants other than R12 or R134a will void all warranties.

If goods are claimed to be other than as warranted, Seller, upon notice promptly given, will either examine the goods at their site or issue shipping instructions for return to Seller (transportation cost paid by Buyer), and if any goods are proved to be other than as warranted, transportation costs (by least expensive method) to and from Seller's plant will be borne by Seller and reimbursement or credit will be made for amounts so expended by Buyer.

Every such claim for breach of the warranties herein contained shall be deemed to be waived by the Buyer unless made in writing within ninety (90) days from the date of shipment of the goods to which claim relates. These warranties shall not extend to any goods or parts thereof which have been subject to abuse or neglect, damage by accident, rendered defective by reason of improper installation, or used for other than the express purpose for which it was designed and built. These warranties shall not apply to any goods or parts made from tools, materials, or parts furnished by the Buyer or acquired from others at his request and/or to his specifications.

CHEMICALS - OILS

Santech – MasterChem™ PAG Lubricants

Premium OEM Single End-Capped Oil

Santech packages OEM Grade PAG46, PAG100 and PAG150. All Viscosities are offered with and without U.V. Dye. PAG46 is equivalent to Delco 10-5040 and the PAG150 is equivalent to Delco 15-118. These are High Quality OEM Service PAG formulations. These Oils are for R134a only, OEM Service and Retrofit.

Ultra Double End-Capped Oil

Developed by OEM Oil Manufactures this Oil provides better Protection against Metal Wear and Moisture Absorption for Corrosion Protection. The Double End-Capped Technology absorbs the Moisture in the A/C System removing it from contact with Metal surfaces reducing Wear and Corrosion. This Lubricant is compatible with R12 and R134a Refrigerants. These are High Quality OEM PAG Oils.

MasterChem™ Enhanced Lubricant

This Lubricant was developed by leading Industry Chemist. This Proprietary Blended PAG Lubricant offers excellent Protection against Metal Wear and Moisture Absorption for Corrosion Protection. This Product is blended with our MasterChem™ Lubricant Enhancer which provides additional additives to reduce Metal Wear and clean the Condenser internally along with the rest of the System restoring the Thermal Efficiency of the A/C System. These Oils are for R134a only, OEM Service and Retrofit.

Santech – MasterChem™ PAG Lubricants

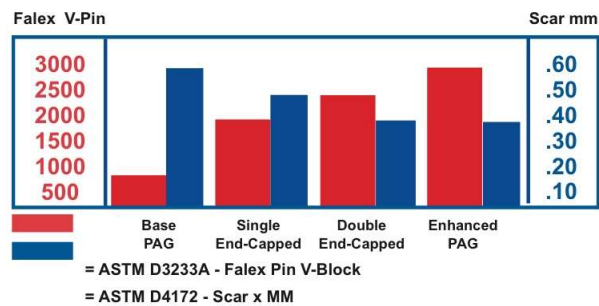

Aftermarket Base PAG Oils

Santech does not supply these type Oils. These Oils usually lack most of the additive packages required for Metal Wear protection and Moisture Absorption for the prevention of Corrosion. They are usually "Price Competitive" offerings in the Market being compared to the higher quality oils.

Overview

Lubricants are subjected to (2) basic test. The Falex Pin & Vee Ball Force lbs Failure (ASTM D3233A) and the 4 Ball Scar Value mm (ASTM D4172) Test. The chart below shows the Failure & Scar averages of Industry Lubricants. The Chart shows test results based on the quality and type of the Oil. Bottom line, the higher the Falex Failure and the lower the Scar the better the lubricant.

CHEMICALS - LEAK DETECTORS

LOKTRACER™ THE REVOLUTION IN LEAK DETECTION

Finding A/C Leaks Fast

The **MT7000** LOKTRACER™ was especially developed for trace gas leak detection in vehicle air-conditioning systems. The unit reacts exclusively to tracer gas, so that cross sensitivity to other gases can be almost completely excluded.

The extra-long and highly flexible measuring probe also allows to check components in the engine compartment which are difficult to access.

Eliminates the need to recover and recycle A/C refrigerant gases reducing equipment cost and expense of lost refrigerant. Tracer gas is Hydrogen/Nitrogen and can be released into the atmosphere.

- ▶ **Rechargeable Battery w/ Charger**
- ▶ **Earphone**
- ▶ **8 Hours of Operation**
- ▶ **Sensitivity 0.03 oz. per year**

Technical Data

Time until ready	<90 sec.
Response time.....	1 to 2 Second
Operating temperature	5° to 122° (-15° C to 50° C)
Storage temperature.....	13° to 122° (-25° C to 50° C)
Operating period.....	8 hours w/ new batteries
Power supply.....	4 x AA mignon batteries
Dimensions.....	19" x 1.75" x 1" (480 x 44 x 28 mm)
Weight	5.65 oz. (160 g without batteries)

MT7000

Trace Gas Leak Detector

- ▶ Rechargeable Battery w/ Charger
- ▶ Earphone
- ▶ 8 Hours of Operation
- ▶ Sensitivity 0.03 oz. per year

The unit reacts exclusively to Tracer gas, so that cross sensitivity to other gases can be almost completely excluded. The extra-long and highly flexible measuring probe also allows checking components in the engine compartment which are difficult to access.

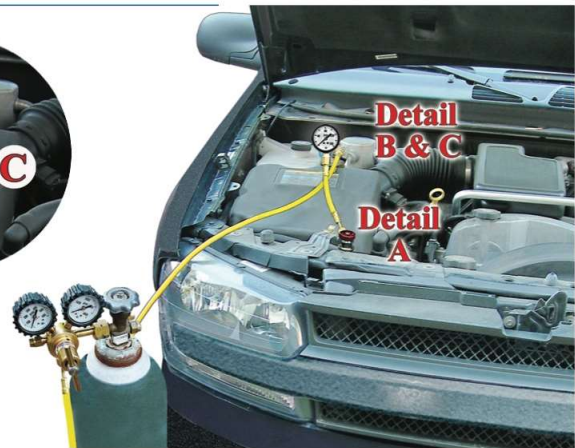

MT7001

Regulator Kit

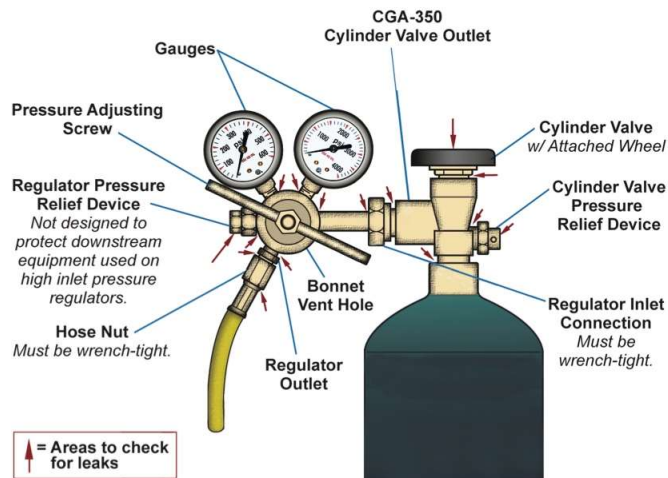

Vehicle Hook-Up

- ▶ Tank Coupler to Low Side
- ▶ 160 PSI Gauge Coupler to Hi-Side

Cylinder Tank Hook-Up

Hydrogen Mix = 95% Nitrogen
5% Hydrogen

Testing Procedures

- ▶ A/C System needs to be free of refrigerant before pressurization with tracer gas.
- ▶ Tank Valve - Off.
- ▶ Pressure adjusting screw - screwed out.
- ▶ Connect hi and low side couplers and open.
- ▶ Tank Valve - On.
- ▶ Turn pressure adjusting screw inward to reach 100-150 PSI.
- ▶ The 160PSI gauge can be removed and maximum pressure of 225PSI can be applied if leak not detected on initial check.
- ▶ Tank Valve - off, pressure adjusting screw - screwed out.

Testing Tips

- ▶ Hydrogen is lighter than air - check for leaks above connections.
- ▶ Evaporator leak check - after 10 minutes - check at defroster vents, dash outlets and floor vents.
- ▶ Remove couplers and check valve cores and service ports.
- ▶ Remove shop fans and any wind that can disperse the hydrogen.

- ◆ Transducers are the most common control sensors on A/C Systems of 2013 - 1997 vehicles.
- ◆ The voltage/reference signal from the transducer to the ECM controls the low and hi-pressure cut-off, cooling fan or fan clutch operation.
- ◆ Transducers do not always completely fail but get out of specification. The MT3700 allows the technician to compare voltage signal to system pressures with the A/C System in operation. This provides accurate PSI to voltage data for diagnostics of the Transducer and A/C system operation.

ORIFICE TUBES

MT3200 - Universal In-Line Filter Assembly

What is different about this new service filter?

Issue #1

Provides a simplified robust leak free installation. The original filter design incorporated an O-Ring to seal around the a/c tube OD. Successful installation required a smooth round surface. Technicians pointed out the obvious field reality:

- 1) All tubes are not perfectly round.
- 2) Tube finish does have surface imperfections.
- 3) Installing the filter collar twice to assure proper seating is non-productive and technician sensitive.

The redesigned filter replaces the single O-Ring with a robust tapered sealing sleeve. The sleeve provides 10 times the sealing area and greatly increases the seal's ability to overcome field tube irregularities. The additions of slots on the brass collar permits the collar to seat correctly on the first installation as well as increase compression on the sleeve.

Issue #2

Increased debris containment. The redesign incorporates a new screen within a new body. This not only shortens the overall filter length but also increases three-fold capacity while reducing pressure and flow restrictions.

Issue #3

Several models and inability to cover new systems. The old filter had four P/N's. Two tube sizes with a variation of each to incorporate a .072" orifice. The new unit is universal and fits the same tube sizes plus the 5/16", common to TXV systems. In addition, the universal unit permits the technician to rework an existing orifice (regardless of size -.072", .062", .052", etc) and incorporate it into the filter. This greatly simplifies inventory and increases technician flexibility. Overall, the new filter should provide the insurance the technician has been requesting to reduce comebacks on compressor replacements, especially with rear a/c systems.

Metal Tube Splice Kit

Double Seal Design with Brass Ferrule and HNBR Rubber Ferrule Sleeve and the Aluminum Housing and Nuts provide leak proof seal and corrosion resistant.

- MT3201 #5 (5/16") x #5 (5/16")
- MT3202 #6 (3/8") x #6 (3/8")
- MT3203 #8 (1/2") x #8 (1/2")
- MT3204 #10 (5/8") x #10 (5/8")
- MT3205 #12 (3/4") x #12 (3/4")

Fits 3/8", 5/16", 1/2" Dia Tubes
Can be used with
or without orifice tubes.

Automotive A/C Components™

RAPID SEAL™ A/C SYSTEM SERVICE KITS

Rapid-Seal™ A/C Service Kits

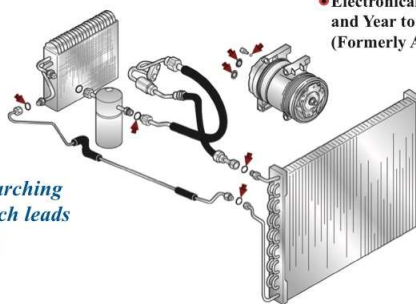

U.S. Patent 7,325,809

Santech Industries has been leading the A/C Aftermarket for over 30 years with unique and innovative products. Santech has invested many years of Research and Development and an undisclosed amount of funding to develop this Product and pursue the Patent. This was an incredible challenge to design kits that are "accurate, specific and cost effective" Santech was the first to undertake the challenge of detail Vehicle research on each A/C System and assemble the information required to develop these kits.

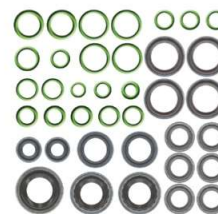

The development of the Rapid Seal Kit™ has changed the way Counter Personnel and Technicians source Sealing Media requirements for their A/C repair jobs today. These kits service the entire system's connections including rear A/C vehicles and are cataloged by Make, Model, Year and Engine.

They provide a simple solution to a once dreaded task of searching through Box Kits for many small items to do one job. Santech leads the way again with Products that have changed the Market.

- All the Seals to complete the Job!
- Buy and Bill by the Job!
- Increase Your Sales and Profits!
- 2017 – 1985 Applications!
- Fast and Easy -No more Seek and Find!
- Over 97% of the U.S. Vehicle Market!
- SUV and Van Rear Air Applications!
- Electronically Cataloged by Make, Model and Year to ARIA, EPICOR (Formerly ACTIVANT/CCI/Triad), Wrenchhead

TOOLS

This Refrigerant Identifier is just what Today's Professional A/C Technicians have been waiting for.

MT1504 Refrigerant Identifier w/ printer

- ➔ Utilizes dispersive infrared (NDIR) technology to determine the weight concentrations of R12, R134a, hydrocarbons & air.
- ➔ "Blend-ID" analytical software identifies all EPA S.N.A.P. approved blends.
- ➔ Identifies illegal replacements & blends including propane & butane.
- ➔ Quickly & automatically determines if the purity of R12 & R134a refrigerant is at industry acceptable levels.

Includes:

(1) Refrigerant Identifier Unit Instruction Manual

MT1507 - Filter

MT1508 - R12 Hose

MT1510 - Single Paper Roll

MT0948 - R134a Adapter Fitting
for ACME ported cylinders

MT1503 Refrigerant Identifier w/o Printer

Features & Specifications

1. Built-in Printer for easy customer billing.
2. Large graphing display for easy reading & operation.
3. Replaceable filter.
4. Rugged portable case.
1 Year Warranty

MT1501 A/C Sealant Quick Detection Kit

Includes:

- ➔ A/C Coupler
- ➔ Flow Meter
- ➔ (10) Test Cartridges
- ➔ Carrying Case
- ➔ Test Hose
- ➔ Syringe
- ➔ R12 & R134a Couplers
- ➔ Instruction Manual

The **MT1501** A/C Sealant Detection Kit unit draws a refrigerant sample from the A/C System. If sealant is present, it will quickly solidify in the disposable test cartridge & cause the Flow Meter to read "no flow".

- ➔ Quickly verifies if sealant is present in A/C system
- ➔ Prevents possible damage to valuable recovery equipment
- ➔ Works on R134a & R12 systems
- ➔ Disposable, low cost design

TOOLS

MT3700 Pressure Transducer Tester Kit

With the introduction of Pressure Transducers there is the need for an easy way to test.

This Tester is reasonable in price compared to vehicle data specific scan tools.

The concept is simple: a plug in device that can read the signal and test the vehicle.

- Reads signal to transducer from vehicle.
 - Vehicle computer to Transducer Check.
 - Send signal to vehicle through tester.
 - Set system off - low PSI.
 - Run cooling fans with mid range PSI 200-250 PSI.
 - Shuts system down when voltage saturates 4.5 volts.
 - Verify signal to transducer is correct and vehicle responds correctly with manual input for all operations.

Testing Unit includes:

Hand Held Unit for Operation Control

Test Leads:

MT3701 A/C Thermistor Tester Kit

- Thermistors are found on most late model vehicles.
- The clutch cycle switch or thermostatic switch has been replaced by an evaporator thermistor and sun load sensor.
- These are passive devices that communicate with the vehicle computer.
- The need to test these components and the system operation is required.
- The concept is simple, an in-line plug in device that can read the signal and communicate with the vehicle computer to test operation.
- Most Thermistor or Sun Load sensors fail because the ceramic tip cracks and loses continuity of the circuit or deteriorates over time.
- The tips are not repairable.
- Some evaporator thermistors require 4 to 5 hours to service.

TOOLS

MT3750 External Control Valve Tester

The MT3750 external control valve tester is simple to connect to & operate on many types of compressors. Vehicle specific & universal connections.

- Check control solenoid
- Check input signal from A/C control unit to solenoid.
- Issue variable commands to solenoid to drive compressors.
- Battery operated
- Digital display
- Affordable and Accurate
- The tips are not repairable.
- Increase or decrease compressor demand by simply using the arrow functions.

“THE TIME HAS CHANGED”

The A/C Pressure Transducer is the key sensor component in 2002 and newer Mobile A/C Systems. It has replaced multiple contact switches found in previous A/C systems. These systems contained as many as (4) switches. A/C pressure transducers produce two types of signals. The first version is analog/linear 5 volt reference signals.

The second version of sensors use a digital signal. There are several types of digital signal outputs which are growing in popularity among OEMs such as PWM (Pulse Width Modulation) and digital signals delivered using LIN/CAN bussing chips for use in LIN/CAN data systems. Santech A/C Pressure Transducers by *Trensor*® are produced to the highest level of quality. The accuracy of these components are critical. The signal from this sensor tells the ECM or PCM exactly what the A/C system pressure is for precise A/C system functions.

Reference Signal Provides

- Low Pressure System Cut-Off
- Cooling Fan Operation
- Cooling Fan Speed
- Electronic Fan Clutch Operation
- Hi-Pressure System Cut-Off

The Santech A/C Pressure Sensor by *Trensor*® provides your customer with these benefits.

The Design

- Patented State-of-the-Art Processor Chips
- Accuracy of 1-3% Full Scale Output
- Analog/Linear & Digital/PWM designs
- Tested for High Stability and Endurance
- Designed with piezoresistive Wheatstone bridge technology to reduce or eliminate outside electromagnetic interference signals

The Products

- 26 Part Numbers providing 95% of Industry Coverage
- Pin Out Diagrams for all Part Numbers
- Complete Catalog Listings by AAIA Standards
- Many Dealer-Only Part Numbers covered
- OEM Cross Reference Table
- Operating Specification

Santech's comprehensive line of A/C Pressure Transducers by *Trensor*® will offer you and your customers an easy solution with a quality product and in depth coverage.

MT3750 External Control Valve Tester

The MT3750 external control valve tester is simple to connect to & operate on these types of compressors

KIT ITEMS WITH CASE

Complete compressor operation analysis in 3 easy steps:

- Check control solenoid
- Check input signal from A/C control unit to solenoid
- Issue variable commands to solenoid to drive compressor

External control compressors are commonly found on late model vehicles.

Vehicle specific & universal connections
Battery operated - Digital display

Affordable - Accurate

Increase or decrease compressor demand by simply using the arrow functions

MT3730 Temperature Tester

Temperature diagnostics takes the guess work out of A/C repair. "Do the job right the first time" with accurate A/C temperature readings from Santech's Temperature Tester!

Flexible direct contact thermocouples for fast and accurate temperature readings even in the hard to reach areas.

Identify: Internal restrictions on condenser

Verify: Poor air flow across the condenser
Evaporator flooding levels on orifice tube system
Expansion valve performance
Receiver Drier refrigerant flow

Provides accurate temperature differences after any A/C repair. Detailed temperature and diagnostic chart included. Battery operated - Digital display - Reads Fahrenheit and Celsius
